

Snežana Đurić

BioSense Institute, University of Novi Sad
Dr Zorana Đinđića 1, 21000 Novi Sad, Serbia
Email: snisko@uns.ac.rs, snezana@biosense.rs
Phone: +381 21 485 2138

Education

Faculty of Technical Sciences, University of Novi Sad, Serbia
PhD in Electrical and Computer Engineering, 2013

Faculty of Technical Sciences, University of Novi Sad, Serbia
Master in Electrical and Computer Engineering, 2007

Work Experience

- 2008 – 2011 Research assistant, Department of power, electronics and communications, Faculty of Technical Sciences, University of Novi Sad
- 2011 – 2014 Research associate, Department of power, electronics and communications, Faculty of Technical Sciences, University of Novi Sad
- 2014 – July 2015, Research Assistant Professor, Department of power, electronics and communications, Faculty of Technical Sciences, University of Novi Sad
- July 2015 - Research Assistant Professor, BioSense Institute, University of Novi Sad

Fields of interest

Nano and microtechnologies, design, modeling, optimization, fabrication and characterization of nano and microsystems

Reviewer

- *IEEE Transactions on Industrial Electronics*
- *IEEE Transactions on Magnetics*
- *IEEE Sensors Journal*
- *International Journal of Applied Electromagnetics and Mechanics*
- *Microelectronics Journal*
- *Microelectronics International*

Grants

Student travel grant to attend “The 11th Joint MMM/Intermag Conference”, January 18-22, 2010, Washington, DC, granted by Conference Organizing Committee

Scholarship to attend IEEE Magnetics Society Summer School, May 22-28, 2011, New Orleans, USA, granted by IEEE Magnetics Society

Projects

National projects

- 2008 – 2010 New configuration of ferrite transformers and EMI suppressors for DC/DC convertors and telecommunications' modules, project number TR11023
- 2011 – 2015 Innovative electronic components and systems based on inorganic and organic technologies embedded in consumer goods and products
- 2011-2015 Synthesis of nanopowders and processing of ceramics and nanocomposites with specific electric and magnetic properties for application in integrated passive components, project number III45021

International projects

- Reinforcement of the Center for Integrated Microsystems and Components (ReCIMiCo), proposal No.:043669, 2007-2009
- New Generation of 3D Integrated Passive Components and Microsystems in LTCC Technology, the EUREKA Project E!4570 IPCTECH, 2009-2012
